Company: PeopleSoft Ibérica	Dates: 1996-1999	Technical Manager
-----------------------------	------------------	-------------------

In 1996 started to work for PS Ibérica as Technical Leader.

Different types of Works:  
Installations, Upgrades, Architecture recommendations and tuning.

All in versions 6, 7 y 7.5

Responsible for the support team for Iberia.

Responsible for the Quality assurance and ISO certification for Spain

During these years, participated in projects in Spain, Italy, Germany, UK, France, Holland and EEUU.

Company:European Technology Consulting	Dates: 1999-2002	Manager
--	------------------	---------

I founded this company in 1999 as a local PS partner.  
We focused in PS installations and implementations. Worked in more than 20 customers

Company:Transportes AZKAR	Dates: 2002-2005	Technical Leader of PS Applications
---------------------------	------------------	-------------------------------------

Role of technical leader to coordinate all the task related to PS implementations.

Responsible for:

- ✎ Architecture recommendations.
- ✎ Installation, upgrade, Patches and fixes.
- ✎ Setup new data model.
- ✎ PS Administrator
- ✎ Tuning of the systems

PS versions 8, 8.4

Freelance	Dates: 2005-2011	Ror Expert
-----------	------------------	------------

I offer services as freelance Sr. RoR developer other roles as:

1. WireFraming and customer interviews
2. System design and Object Modeling
3. Develop easy and quickly prototypes
4. Agile Scrum methodology

I have deploy many applications in Ruby on Rails from 2005. Actually I use rails 3.2, 3.1 and 3.0 apps, some of the technology, gems, utilities and other... are:

- Rails 2.x, 3.x
- HTML5 and CSS3
- JavaScript (jQuery)
- Oauth and Devise authentication gems
- Cucumber, Rspec
- Mysql, postgresql as databases
- Capistrano and Chef for deploy
- AMAZON S3 and CDN technologies for store and Cloud front
- Using Vim, Textmate and now SublimeText2
- Git as repository
- Heroku as production platform

Some of these applications have been public startups or public webs and others are on the background of my customers.

Two examples of my projects are:

1.- <http://www.volterra.es>

Volterra is a typical Spanish 'Bar de tapas' Located in Mérida, Spain and they are very confident with social media. This project was developed with Ruby On Rails 3.1, html5, javascript, and css3. (The company closed last September)

2.- <https://azkar.facturama.es>

TRANSPORTES AZKAR is the biggest transportation and logistics company in Spain. I have built the Suppliers portal, where the homologated suppliers after a registration process can see information about the purchase orders, invoices, and submit request to purchase and financial departments. Rails 3.2, jquery, postgresql, amazon cdn, amazon s3, heroku

You can view some of my projects in <https://github.com/jalonsoad>

Some of the customers I have been working on:

Transportes AZKAR, S.A.

ASPGEMS

BUYVIP SPAIN

BUYVIP GEMANY

BUYVIP ITALY

IDEAS4ALL.com

Beruby.com

Sanitas.es

ORACLE

Audioboo	Dates: 2012-now	Head of development
----------	-----------------	---------------------

I'm the Head Of Development of this social network.

My responsibility is plan, test, develop new functionality of the product as ensure the platform is working as expected. We're using RoR, Rspec, HTML5, javascript, JQuery, MYSQL, Redis, Sphinx... between other technologies.

I'm responsible of the architecture/platform and in charge of design the SEO strategy and setup google analytics in order to obtain as much information from the platform as we can.

## Languages and others

Spanish: Mother tongue.

English: High level, read and write.

Willing to travel and change residence.
